
Lamiglas®
FISH WITH CONFIDENCE
2013/2014 ROD CATALOGUE

OUT CAST. OUT TROLL. OUT LAST. OUT CATCH.

Nearly 100 new rods, component upgrades, and cosmetic enhancements highlight the line-up for 2013, including several entirely new series' which technology has only recently enabled their existence. The New Lamiglas Si, Bug Slinger, Infinity Bass and Infinity Fly Series, are modern marvels in they're own right. Lamiglas has mastered the use of 3M™ Powerlux™ Resin to improve strength and reduce significant weight.

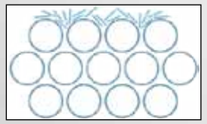

THE POWERLUX™ REVOLUTION - LAMIGLAS STYLE.

3M Company's Powerlux™ Composites feature a revolutionary technology that transforms how carbon fiber materials perform. This breakthrough is enabled by 3M's unique ability to formulate resin systems with high concentrations of spherical nano-sized silica particles. Because the particles are so small, they are able to flow between individual filaments of carbon fiber, providing a dense matrix of strength throughout the entire composite. The resulting material enables Lamiglas rods designers to develop rods that are not only incredibly strong and durable, but also lighter in weight and more sensitive.

Standard composite materials have lower resin stiffness and are prone to cracking or buckling under the stresses a rod sees during a good day of fishing. The more nanoparticles the resin contains, the higher the crack resistance and overall rod toughness. The Powerlux™ composite material contains an astonishing 40 percent of nanoparticles uniformly dispersed and densely packed throughout the resin.

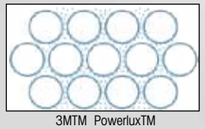

While other companies have reported adding nano technology to their composite materials, none have been successful at adding more than single-digit percentages. Carbon nano tubes, for example, have a high length-to-width ratio of 15:1, so they are not able to disperse uniformly throughout the carbon fibers as shown in Fig. 3.

3M™ Powerlux™ is truly a game changer that bends the rules of carbon fiber composites. The tiny, spherical nanoparticles create such a strong bond between the carbon fibers that rod stress is more evenly dissipated, leading to a significantly stronger, more durable and more flexible rod. By improving strength and sensitivity, Lamiglas rods with 3M™ Powerlux™ gives you performance when it counts.

Carbon Nano Tubes

Inch for inch, dollar for dollar, component for component, you'll love the way these new and proven Lamiglas rods will out-perform all other models in their class. It's a statement we can boldly make because we confident of the outcome.

3MTM PowerluxTM

NEW SERIES FOR 2013

NEW SALMON/STEELHEAD RODS:
- Si Steelhead Series
- X-11 Salmon Steelhead

NEW FLY RODS:
- Bug Slinger
- Infinity Si Fly
- X-ll Fly

NEW FRESHWATER/BASS RODS:
- X-11 Freshwater
- Infinity Bass
- Pro X Bass
- Competitor Tour Spin & Cast

NEW SALTWATER/SURF RODS:
- Black Salt
- Excel Inshore
- Infinity Surf

WE'LL GLADLY BE HELD ACCOUNTABLE FOR OUR ACTIONS.

TO SELECT THE RIGHT LAMIGLAS ROD, PAY CLOSE ATTENTION TO THE DETAILS. (WE DO.)

Surprisingly, there is no consistent, scientific methodology that all rod manufacturers use to rate their rods. Some use computers. Others use complex graphs. We use fish...along with more than 60 years of experience. Each rating is a collective recommendation of the hi-low thresholds in which the rod is designed to optimize performance. The variable factors for each rod, lure weight, line weight, action, and power are clearly listed throughout this catalog, as well as labeled on the rods just above the handle. (Not all factors are appropriate for all rods. For example, fly rods will not list a "lure weight.")

ACTION POWER TYPE DEFINED

S	=	Spinning Rod
C	=	Casting Rod
T	=	Trigger
LL	=	Extra Light
UL	=	Ultra Light
L	=	Light
M	=	Medium
H	=	Heavy
XH	=	Extra Heavy
J	=	Jig
P	=	Plug
B	=	Bouncer
+	=	Telescopic Handle
PO	=	Power Oval Guides
CP	=	Centre Pin
TN	=	Tennessee Handle
W	=	Wire Line Guides

ROD MATERIALS

3M™ POWERLUX™ COMPOSITES

Used in Lamiglas Si, Bug Slinger, Infinity Bass and Infinity Fly, 3M™ Powerlux™ Composites feature a revolutionary technology that contains nano-sized spheres of silica so small, they are able to flow between individual filaments of carbon fiber, creating a matrix of strength throughout the entire composite. The resulting material enables designers to develop rods that are not only incredibly strong and durable, but also lighter in weight and more sensitive.

XMG 50 GRAPHITE THE NEWEST "SUPER" GRAPHITE.

This super graphite allows us to make smaller-diameter blanks with faster actions. The XMG 50 utilizes a blend of high-modulus graphite fibers to create a perfectly balanced, lightweight blank that is more responsive and more sensitive than anything on the market today.

CERTIFIED PRO GRAPHITE REMARKABLY LIGHTER AND STRONGER.

The Certified Pro series employ an all-new smaller-diameter blank design with an improved resin system to produce a 15 percent lighter-weight rod than comparable graphites on the market.

G1000 GRAPHITE A LAMIGLAS EXCLUSIVE.

This is our most distinguished and versatile material. We employ first generation graphite coupled with a special resin formula to reduce overall weight while maintaining exceptional flexibility.

FIBERGLASS E-GLASS EARNED ITS PLACE IN HISTORY.

This material is structurally the most durable of the fiberglass family. The glass properties are expressly matched to each unique application. We use the same epoxy resins and technology in these rods as we do in our graphite rods to offer you lighter weight and improved sensitivity.

TRI-FLEX EXCLUSIVE GRAPHITE/FIBERGLASS CONSTRUCTION.

A graphite base and fiberglass overwrap is reinforced with graphite through the butt and mid sections. You get the best of both worlds. We refer to this as "tri-wall" construction. The tips are lightning fast and softer so they cast live bait as well as throw heavy iron, while the graphite reinforced portion of the rod gives tremendous fish-fighting control and lifting power.

ACTION. WE MAKE IT HAPPEN.

"Action" is the measurement of deflection or flex the rod exhibits under load, and more importantly, where that flex occurs along the length of the blank. "Extra Fast" actions concentrate more of the flex towards the tip. "Slow" actions distribute the flex progressively throughout the entire blank. Lamiglas rod actions are dictated by a variety of factors: the intended application, targeted prey, lure weight and line weight.

POWER. HOW MUCH DO YOU NEED?

Applicable to our salmon, steelhead, saltwater and bass rods, "power" is defined by the amount of pressure required to flex the blank. These rods are designed to optimally manage a specific range of lure and line weights. The heavier the line and lure, the more power you'll need to cast, fight and pull effectively. The lighter the line and lure, the less power you'll need.

WEIGHT. LOSE AS MUCH AS POSSIBLE.

A rod that feels heavier each time you cast eventually slows you down. The type and amount of material used contributes greatest to this factor. Lamiglas selects the lightest material and components for the job, but we resist the temptation to go "too light." We design rods that will cast for a lifetime, without ever leaving your arms lifeless.

TAPER. HERE'S THE SKINNY.

The measurement of the change in the diameter of the blank from tip to butt is known as taper. Many use the term synonymously with "action." But actually, taper is one of the factors which rod builders use to achieve the desired action. An aggressive taper at the tip creates a faster action. A straight taper (one which changes at an equal rate throughout the blank) creates a moderate or slower action.

PROLONG THE LIFE AND PERFORMANCE OF YOUR LAMIGLAS ROD.

Lamiglas fishing rods are built with the finest materials available and constructed to exacting standards. Our expectations of every rod are as high as those anglers who fish with them. With some common sense and careful handling, your Lamiglas rod will offer a lifetime of exceptional experiences.

LINE RATINGS

The individual characteristics built into each and every Lamiglas rod highlight the rods intended use. As a part of that, the strength and flex of the blank is balanced to the recommended line ratings. A Lamiglas rod is rated so that when the rod is held at a 45-degree angle or less, line within the rating will break before the rod does. Angles greater than 45-degrees transfer undue stress to the tip section of the rod (practically eliminating the ability of the stronger butt section to carry any load), and in extreme cases can result in rod failure with as little as 2 pounds of directed pressure. It is not only proper use that requires a rod angle of 45-degrees or less, but this is also the area where you'll find the greatest power from the rod and best control over the fish.

LURE RATINGS

Lure ratings provide a range of lure weights in which optimum performance is achieved. Using a lure that is lighter than the listed weight will not properly load the rod, casting distance and sensitivity will suffer. Using a lure that is heavier than the listed weight will overpower the rod. Again, distance and sensitivity will suffer, along with the compounded problem of overstressing the blank fibers.

REEL INSTALLATION AND REMOVAL

Prior to reel installation, lubricate the reel foot and the threads of the reel seat. Insert the reel and tighten the lock-nut finger tight. Shake the reel side-to-side and tighten again. Repeat the process until the reel no longer moves. Graphite reel seats should never be over-tightened and pliers should never be used in the process. Over extended periods, the reel seat hood may seize to the reel foot. Slowly loosen the reel nut. If it starts to seize, tap the hood. This will break loose the deposits that have built up over time. Continue to loosen the nut. If you do not tap the hood loose, you may separate the hood from the nut.

TRANSPORTATION

The key to rod transportation is eliminating sharp impact to the blank. The best place for a rod to travel is inside a protective tube. If not carried in a tube, the rods should not be left to bounce against other rods or terminal rigging (weights, heavy swivels, lures, etc.) At vehicle travel speed, sharp impacts from these items can fracture the rod blanks. The best way to transport multi-piece rods is with rubber bands holding the sections together. Always affix the sections tip-to-tip and butt-to-butt. This keeps the delicate tip from being crushed against the uneven and much larger handle. Also, do not use hair bands with a metal connecting clip on rods as the metal clip can scratch, or worse, fracture the blank.

STORAGE

Store rods in either the vertical or horizontal position. If leaned in a corner, a set or bow in the rod can occur over time. Never leave your rods where critters can get to them. Scents, salt from perspiration and other biologic contaminates are a sure-fire attraction to undesirables.

CLEANING THE ROD BLANK

The best cleaner we have found for cleaning the blank and handle is a mixture of one part isopropyl alcohol and four parts warm water, along with a good dose of liquid dish soap. Using a soft sponge, scrub the blank and handle, then rinse. Dabbing problem areas with the soap mix for a few minutes before scrubbing can soften heavy build-up. Once you have the rod clean, a coat of wax will simplify the maintenance of a beautiful finish. We recommend any of the carnuba based car waxes. Fish scales and many types of bait will not stick to a waxed rod and it makes cleaning a snap. If you are fishing everyday, a coat of wax every other week should suffice.

CLEANING GUIDES AND REEL SEATS

As strange as it may sound, the use of a toothbrush and toothpaste will remove the stubborn deposits on rod guides and reel seats. After cleaning the reel seats, coat with any light oil. This method works on all reel seats.

OVER 60 YEARS OF SENSITIVITY TRAINING AND THEY'RE STILL RUTHLESS.

There's a sensitive side to every Lamiglas salmon and steelhead rod, but lurking deep within the blank is a sinister side with one thing on its mind – whack'em and stack'em. Lamiglas crafts more technique-specific rods than any other manufacturer, and there are countless reasons why every angler should own each and every specialized model. But we're also realists, understanding that when the rods in your garage start taking precedence over the food in your fridge, people will begin to ask questions. So, there are plenty of multi-purpose rods here as well.

SI SERIES

NEW FOR 2013

The all-new Lamiglas Si Series reflects the absolute best in rod construction and design. Greater sensitivity and strength is achieved using 3M™ Powerlux™ Resin. Now, with this innovative new technology, salmon and steelhead anglers will enjoy superior strength, as much as 40% more strength, with no added weight. 3M™ Powerlux™ Composites feature a revolutionary technology that contains nano-sized spheres of silica so small, they are able to flow between individual filaments of carbon fiber, creating a matrix of strength throughout the entire composite. The resulting material enables Lamiglas designers to develop rods that are not only incredibly strong and durable, but also lighter in weight and more sensitive. The Lamiglas Si Series also features titanium K-frame guides and exposed-blank reel seats.

XMG 50

XMG 50 rods prove that technology does increase performance. Constructed from a cutting-edge blend of high-modulus graphite fibers, XMG 50 rods combine an aerospace blank material with woven graphite handles to deliver a fishing experience that maximizes every cast, strike and fight. The new EXS 96M is 9' 6" drift rod. You'll feel everything, yet marvel at the lack of weight. If your passion for fishing is greater than your available time, XMG 50's make the most of every moment.

CERTIFIED PRO KWIK SERIES

Take downs stay down! Formally our "Certified Pro Fiberglass" series, we've fully integrated our proprietary fiberglass and graphite blends throughout the line and tagged them all as "Kwik" rods. Why? Because kwik results are the rule here. The XCC 934 and XCC 1064's have taken over the professional guide community as the ultimate salmon trolling rod. Long, soft, and forgiving, these rods allow trolled and back-trolled plugs and bait to produce more action. The XCC 903, 934 and 1064 are sensational downrigger rods. We've added graphite handles to several models to enable effortless removal from rod holders. All models feature Fuji reel seats and Fuji Concept Guide System.

CERTIFIED PRO

Certified Pro salmon and steelhead rods represent the singular best value in premium performance rods. Special blends of high and intermediate modulus graphite are used to achieve the optimum actions and ultra-small diameters. This is our backbone series where drift, jig, float, and back bounce anglers find the technique specific characteristics necessary to excel on the water every day. Select GH models are outfitted with graphite handles to further elevate their performance and long wearing comfort in your hands. The all-new X 80 HBC GH is a monster of a backbouncer for large Chinook and inshore saltwater applications. Certified Pro models include Fuji Alconite Concept guides, exposed-blank reel seats on casting models and premium cork.

G1000 SERIES

G1000 rods return to their classic polished blank finish for 2013. Beauty aside, performance is where the G1000 series shines. Lamiglas G1000 series earned their place in angling history by providing high-quality American-made fishing tools at an honest value. Most are highlighted with technique and territorial names like Hot Shot Magnum, Salmon Moocher and Back Bouncer, but please don't assume these are the sole application in which these rods excel. Our Herring rod is an exceptional big bobber rod. The Hot Shot Magnum fishes divers and bait with result-generating perfection. And the Kenai rods knock the fins off salmon, wherever they swim. G1000 rods are purebred workhorses, accepting the challenges of demanding fish and techniques and responding with a power, form and function for a lifetime of heavy use. New features include deep pressed guides and blank-thru reel seats on drift fishing models.

X-11 SALMON/STEELHEAD NEW FOR 2013

These rods are sophisticated tools, exhibiting astonishing sensitivity and control, with highly focused affordability. We've selected deep press chrome guides, constructed of stainless steel. The combination of their deep pressed ring design and finish allows these guides to hold up to the most rigorous of fishing conditions. Exposed reel seats provide additional sensitivity and feel, while the glossy merlot color, IM graphite blanks are strikingly beautiful.

CLASSIC GLASS SERIES

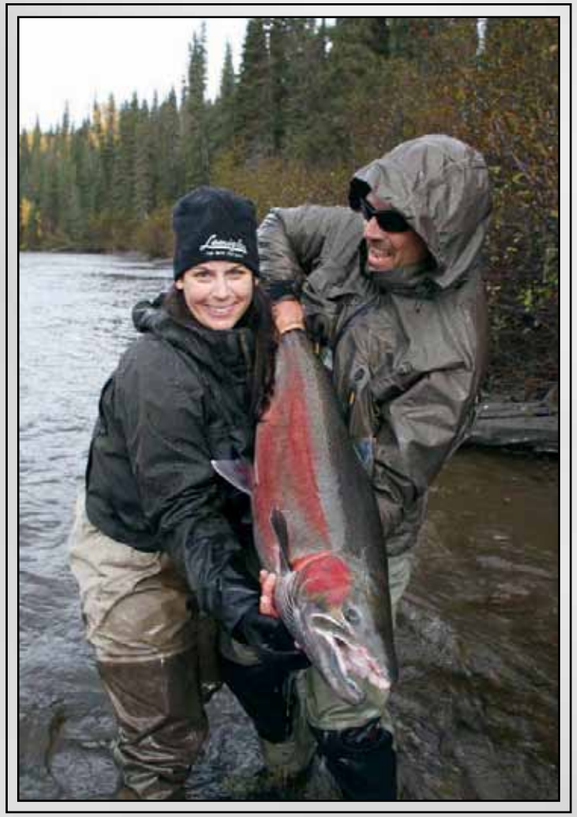

These rods are for the plug pullers, backtrollers, herring trollers and downrigger anglers that excel on the water by keeping it simple. The premise behind moderate action glass rods is simple: if you allow a fish to get a firm hold of your bait or lure, the result will be a solid hook-up. And most often it really is just that simple. Traditional styling makes these rods all-around winners.

"New Models for 2013 are highlighted in blue."

EVEN AT 9-FEET IN LENGTH, THE LEARNING CURVE IS EXTREMELY SHORT.

Searching for perfection? Look no further than Lamiglas. We've gone to extensive lengths to design the perfect marriage of brawn and brains. All the attributes you desire are here and ready to join you wherever your adventures are headed. Suit your casting style and fishing conditions perfectly with our wide range of rod actions. Each and every Lamiglas fly rod is a testament to our commitment of exacting performance and unparalleled quality. These are rods built by hands that love to fish as much as you do. And when you've got one on the water you can tell. The details radiate skilled craftsmanship. The actions are clearly defined and meticulously derived. The components are matched to the intended technique with precision. They load, fire and perform with flawless ease. All in all, Lamiglas fly rods instill great pride with each and every gorgeous, long cast.

BUG SLINGER NEW FOR 2013

We'll place our new Bug Slinger Fly rods, with the new 3M™ Powerlux™ Resin, up against anything and be highly confident of the outcome. Smooth, long, effortless casts with perfect balance and control. These are powerful, 1-piece, saltwater specialty fly rods with a backbone tough enough for big tarpon and wily bonefish. 3M™ Powerlux™ Composites feature a revolutionary technology that contains nano-sized spheres of silica so small, they are able to flow between individual filaments of carbon fiber, creating a matrix of strength throughout the entire composite. The resulting material enables designers to develop rods that are not only incredibly strong and durable, but also lighter in weight and more sensitive. A custom machined aluminum reel seat with woven carbon fiber insert anchors the natural black polished graphite blank.

INFINITY SI NEW FOR 2013

Endless opportunity awaits with our affordable Infinity SI Fly series. Eight, state-of-the-art blanks, with lighter faster actions. 3M™ Powerlux™ Composites feature a revolutionary technology that contains nano-sized spheres of silica so small, they are able to flow between individual filaments of carbon fiber, creating a matrix of strength throughout the entire composite. The resulting material enables designers to develop rods that are not only incredibly strong and durable, but also lighter in weight and more sensitive. Of special note, the ISI 1178 SW is the first ever "switch" rod in our collection - A unique new hybrid cross of traditional casting and spey casting design. All Infinity Si models are finished with exotic machined aluminum and carbon fiber reel seats.

X-11 FLY NEW FOR 2013

Our new X-11 Series teaches another valuable lesson: high-performance doesn't have to come with a high price tag. These moderate/fast action blanks feature our durable IM graphite and deep pressed guides with zirconia inserts. You'll have years, and likely decades, of exceptional casting and catches. The darker maroon color sets a very nice contrast between the reel seat and premium cork handles. (One Year Limited Warranty.)

Our new X-11 Series teaches another valuable lesson: high-performance doesn't have to come with a high price tag.

THE PERFECT ROD FOR YOUR GRANDSON TO PASS DOWN TO HIS SON.

For many young anglers, Dad's collection of Lamiglas rods are regarded in the same circles as his Ping irons and restored muscle car. The quality and value of Lamiglas rods are timeless, often appreciating with every catch brought to the net.

There is no question a Lamiglas rod will improve your angling experience regardless of whether you're a bona fide expert or ambitious amateur. Greater sensitivity translates into more bites detected, and improved durability means your Lamiglas will fish as well today as it will several generations from now.

X-11 FRESHWATER

NEW FOR 2013

All the value and performance of our new X-11 Series for salmon and steelhead are paired down to specialty applications for smaller species like trout, bass, walleye, panfish and kokanee. These fast action blanks feature our durable IM graphite and deep pressed guides with zirconia inserts. The darker maroon color sets a very nice contrast between the reel seat and premium cork handles. (One Year Limited Warranty.)

INFINITY BASS

NEW FOR 2013

3M Powerlux Composites

High technology combines with 60 years of Lamiglas experience. Infinity Bass rods feature 3M™ Powerlux™ Resins. This revolutionary technology features 3M's unique ability to formulate highly concentrated, uniformly dispersed silica nanoparticles. Infinity Graphite composite blanks made with Powerlux resins can achieve incredible strength, durability and sensitivity, while enabling the lightest weight designs. The Powerlux composite material contains an astonishing 40 percent of nanoparticles uniformly dispersed and densely packed throughout the resin. Combined with deep pressed titanium guides, Fuji reel seats and counterbalanced woven graphite handles, the new Infinity series sets a higher standard.

SICK OF MISSING STRIKES? TAKE TWO OF THESE AND YOU'LL BE FEELING BETTER IN NO TIME.

Precise and powerful, the premium materials and actions of Lamiglas saltwater rods maximize every opportunity. From Black Fin to Blue Fin, Stripers to Sailfish, Amberjack to Albacore, a Lamiglas rod is the right choice. Sensitive and responsive, you'll feel every head shake, counter every evasive move, and rejoice in the victory of hard-fought battles. With five uniquely different saltwater rod series' to choose from, starting around $184, it's smart money as well. From the all-around versatility of Lamiglas Tri-Flex models, to the perfectionist qualities of our new Black Salt custom rods, the right rod is right here to allow you to execute your saltwater passions like a professional.

Tri-Flex Graphite Saltwater • Tri-Flex Graphite Inshore • Black Salt • Excel Inshore • Big Fish

TRI-FLEX GRAPHITE SALTWATER

Simplistically, Tri-Flex stands for our proprietary blank designs in which three layers of material, each carefully chosen to provide specific characteristics, are integrated at specific intervals within each blank. More to the point, these rods contain a combination of lightweight power, durability, sensitivity and structural integrity that will provide years, and perhaps decades, of exciting battles.

TRI-FLEX GRAPHITE INSHORE

Cork handles immediately categorize these rods as "inshore," but don't overlook these nine highly capable models wherever the need for refined power of Tri-Flex Graphite exists. Specifically, the new TFX 6015 C, TFX 6015 S and TRX 6615 S. These latest editions are precision balanced rods for throwing bucktails for striped bass, fluke and bluefish. The others are equally at home casting swim baits to tuna as they are throwing eels to stripers or crabs to tarpon. With each trip you'll find yourself gravitating to these rods for their easy handling and can-do nature.

BIG FISH

Big Fish rods are the day-in and day-out offshore performers every angler needs. Their smooth, balanced designs are focused on 20- to 100-pound pound line classes, placing them in the heart of halibut, tuna, shark, large striper and wreck fisheries. Constructed with the finest materials and components, including aluminum reel seats, slick butts and roller tip where necessary. The 7040 W is a wireline rod with silicon nitrate guides. The 7640 C is our premiere cod rod.

ALWAYS JUDGE A ROD BY ITS MAKER.

Lamiglas has been building handmade graphite, fiberglass and composite surf fishing rods in America for 60 years. And while we may be located in the finest salmon and steelhead territory on earth, surf fishing has been a mainstay of our business since the beginning. When you've been dedicated to a trade as long as we have, you become masters of the craft. The process of building the perfect rod isn't so much about knowing "how," (that's a given,) it's about knowing the exact characteristics anglers require to maximize their success. Researching, testing, prototyping and actually stepping out into the sand is the difference between a surf rod and a Lamiglas surf rod.

TRI-FLEX GRAPHITE SURF

The growth of Lamiglas Tri-Flex rods has been astounding, and our proprietary tri-wall construction technology is the main reason why. For 2013 we integrated the expertise of renowned custom rod builder Paul "Paco" Ernandez. Smooth and sleek is the core objective of this newly designed series featuring Fuji reel seats, lightweight aluminte Fuji guides, cork tape grips, black wraps with metallic gold trim. Two one-piece models are destined to adorn the rod racks of innumerable surf bums.

GRAPHITE SURF & JETTY

Pick any beach, any pier, any jetty anywhere around the world and chances are there are fish to be caught…if you have the right equipment. These super-durable graphite rods are ideal for slick rocky shores and pounding waves. Soft tips aid in the right presentation, and the rods have plenty of power to put the brakes on when fish head for the rocks. The distinctive high-gloss, clear-coated design with black wraps and gold accents makes a bold statement. Final touches include Fuji guides, Fuji graphite reel seats and attractive, functional EVA and cork-tape handles.

SURF KING SERIES

From the leader in design and performance on the water comes a whole new challenge for our competitors, the Lamiglas Surf King series. These six rods represent a value unequalled in surf rods. Premium graphite blanks, the finest Lamiglas tapers, aluminum oxide guides and cork tape grips, finished with our black and silver wraps (which, by the way, look great in trophy photos). Be prepared to lug loads of fish up the beach, along with the extra weight of cash in your pocket. Lamiglas one year limited warranty.

DRIFT BOAT OARS

Drift boat owners can now experience the power and performance of Lamiglas even when they're not fishing. More than 60 years of technical expertise in designing the finest fishing rods has expanded to produce the first line of quality drift boat oars with a level of perfection that's, well, perfect. Comfortable, lightweight, and powerful, Lamiglas graphite oars are available in the right styles and lengths to match the waters you row most. Complete counterbalanced oars, shaft and handle, or shaft-only models are available.

Drift boat owners can now experience the power and performance of Lamiglas

LIMITED LIFETIME WARRANTY

Lamiglas rods are warranted against defects in material and workmanship for the lifetime of the original purchaser, unless otherwise stated*. This warranty is limited to the repair or replacement of the rod and does not cover consequential damages due to the failure of the rod unless they are specifically included under various state laws. Selected value-rods offer a one-year limited warranty.
If your rod fails, send it in a disposable container, prepaid and insured, with DATED PROOF OF PURCHASE to:
Lamiglas Warranty Service
1400 Atlantic Avenue
Woodland, WA 98674
Please include a brief message explaining the problem with the rod, your return address, daytime phone number, and a check or money order in the amount of $20.00 in U.S. funds for return shipping and handling. If the return shipping length is over 9' and/or if the destination is other than the United States or Canada, the actual return shipping cost will be assessed. If the problem is due to a defect in materials or workmanship, the rod will be repaired or replaced to you as quickly as possible. If the problem is due to an unfortunate accident, misuse, alteration or normal wear and tear, we will advise you of the cost of the repair or replacement and await your approval prior to proceeding. Please allow 10 working days for processing. This warranty is limited to the repair or replacement of the rod and does not cover consequential damages due to the failure of the rod unless they are specifically included under various state laws.
Note: Lamiglas Dealers are not authorized to make warranty decisions. In order for your rod to obtain the proper warranty inspection and determination, the damaged rod must be sent to Lamiglas Warranty Service.

FAST TRACK WARRANTY

Availability limited to rods manufactured after January 1st, 2007. See rod for date code, i.e. A=January, B=February, 7 is the year. January of 2007 is A7. Code is located immediately above foregrip.
No questions asked direct replacement from Lamiglas. Send the rod and all sections* along with the Fast Track fee below and your complete contact information to:
Lamiglas Customer Service
1400 Atlantic Avenue
Woodland, WA 98674
*For one-piece rods, you need only send a section of the rod that includes the complete logo/graphic area with model number and manufacture date.
We'll send you back a new same model rod. If that model is discontinued or not in stock, then we'll recommend another similar model.
$50 imports (X-11, Competitor Tour, Big Fish, Surf King, Classic Glass.)
$100 for (Si, XMG, Cert. Pro, G-1000, G-1000 spin, Infinity Fly, Infinity Bass, Black Salt, Tri-Flex Graphite Saltwater, Tri-Flex Graphite Inshore, Excel Inshore, Tri-Flex Surf, Ron Arra Surf, Surf & Jetty.)
(Note: there will be an extra charge for international deliveries to cover the cost of shipping. 1 piece rods over 9' will incur an extra charge.)
